Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 5/5/2006 (fax of pending claims).
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

- (1) an editing apparatus comprising a data copying means, and features associated therewith, as described in the 3rd and 4th limitations of independent claims 1, 17 and 27;
- (2) an editing apparatus comprising a single file for storing all of the features associated with the single file, as described by the 3rd limitation of independent claim 37, the 3rd limitation of independent claim 44 as well as by the 2nd limitation of independent claim 51; the editing apparatus also comprising a data generating means/process for causing all of the features associated with the data generating means as described by the 4th limitation of independent claim 37, the 3rd limitation of independent claim 44 as well as by the 2nd limitation of independent claim 51;
- (3) an editing apparatus comprising a registering means and display means for performing all of the features associated with the registering means and the display means/process as described by the 3rd and 4th limitations of independent claims 58 and 61 as well as by the 2nd and 3rd limitations of independent claim 64;
- (4) an editing apparatus comprising a program generating means for performing all of the functions and or features associated with the program generating means, as described by the 3rd limitation of independent claims 67 and 71 as well as by the 2nd limitation of independent claim 75; and
- (5) an editing apparatus comprising an extracting means for performing all of the functions and or features associated with the extracting means, as described by the 3rd limitation of independent claims 79 and 83 as well as by the 2nd limitation of independent claim 87.

The species are independent or distinct because they do not require the specific technical features of any of the other species, as described above, and since each

species would require a different search to address the differences between each respective species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claimed species is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald D. Hartman Jr. whose telephone number is (571) 272-3684. The examiner can normally be reached on Mon.-Fri., 11:00 - 8:30 pm, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Knight can be reached on (571) 272-3687. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
